In the wake of the 2008 financial crisis, many people were left wondering how such a thing could have happened. After all, the financial industry is supposed to be regulated by the government, and we're supposed to be able to trust the people who run our banks and investment firms.

But as it turns out, the financial industry is anything but trustworthy. In fact, it's a cesspool of greed, corruption, and criminality. And it's this greed and corruption that led to the financial crisis, and that continues to threaten our economy today.

In his new book, *How Gang Of Wall Street Kingpins, Hedge Fund Magnates, Crooked Banks, And Vulture Investors Fleece America*, author William D. Cohan exposes the shocking truth about the financial industry. He shows how a small group of Wall Street insiders rigged the system to their advantage, and how they continue to profit at the expense of the rest of us.

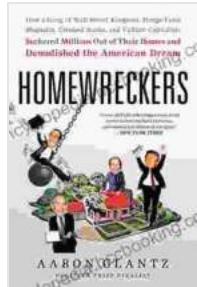

Cohan's book is a must-read for anyone who wants to understand the financial crisis and its aftermath. It's a chilling indictment of the financial industry, and it shows how the greed and corruption of a few can have devastating consequences for the rest of us.

Here are some of the key takeaways from Cohan's book:

- The financial industry is not regulated in the way that it should be. This allows Wall Street insiders to take advantage of loopholes and engage in risky behavior that puts the rest of us at risk.
- The financial industry is dominated by a small group of powerful insiders. These insiders control the flow of money and information, and they use this power to enrich themselves at the expense of the rest of us.
- The financial industry is a hotbed of greed and corruption. Wall Street insiders are more interested in making money than in serving their clients or the public interest.
- The financial industry is a major threat to our economy. The greed and corruption of Wall Street insiders can lead to financial crises, which can have devastating consequences for the rest of us.

Cohan's book is a wake-up call. It's time for us to demand change in the financial industry. We need to regulate the industry more effectively, and we need to hold Wall Street insiders accountable for their actions.

If we don't take action, the financial industry will continue to fleece America. And we will all pay the price.
