Denton is a city of about 130,000 people located in North Texas. For decades, the city has been home to a number of oil and gas companies, and the industry has played a major role in the local economy.

In 2014, Denton became one of the first cities in Texas to pass a fracking ban. The ban was controversial, and the oil and gas industry fought back hard. But the people of Denton stood their ground, and the ban was upheld.

The Denton fracking ban was a major victory for the environmental movement. It showed that even in a state like Texas, where oil and gas are

king, it is possible to stand up to the industry and protect public health and the environment.

The Denton fracking ban is just one example of how communities across the country are fighting back against the oil and gas industry. From coast to coast, people are standing up to protect their communities from the harmful effects of fracking and other oil and gas development.

The fight against the oil and gas industry is not easy, but it is essential. We must protect our communities and our planet from the harmful effects of this industry. The people of Denton have shown us that it is possible to stand up to Big Oil and Gas and win.

### **The Denton Fracking Ban**

The Denton fracking ban was passed by the city council in 2014. The ban prohibits the use of fracking within the city limits. Fracking is a controversial oil and gas extraction technique that involves injecting water, sand, and chemicals into the ground to fracture rock formations and release oil and gas.

The oil and gas industry fought back against the Denton fracking ban, arguing that it would harm the local economy. But the people of Denton stood their ground, and the ban was upheld.

The Denton fracking ban is a major victory for the environmental movement. It shows that even in a state like Texas, where oil and gas are king, it is possible to stand up to the industry and protect public health and the environment.

### **The Fight Against Big Oil And Gas**

The fight against the oil and gas industry is not easy, but it is essential. We must protect our communities and our planet from the harmful effects of this industry.

The oil and gas industry has a long history of polluting our air, water, and land. Fracking, in particular, has been linked to a number of health problems, including cancer, birth defects, and respiratory problems.

The oil and gas industry also contributes to climate change. The burning of fossil fuels releases greenhouse gases into the atmosphere, which trap heat and cause the planet to warm.

We must transition to a clean energy economy as soon as possible. We need to invest in renewable energy sources, such as solar and wind power, and we need to reduce our reliance on fossil fuels.

The fight against Big Oil and Gas is a global fight. People all over the world are standing up to protect their communities and their planet from the harmful effects of this industry.

We can win this fight, but it will take all of us working together. We need to educate ourselves about the issue, we need to get involved in our communities, and we need to support organizations that are fighting to protect our planet.

The people of Denton, Texas, have shown us that it is possible to stand up to Big Oil and Gas and win. They have shown us that we can protect our communities and our planet from the harmful effects of this industry.

The fight against Big Oil and Gas is not easy, but it is essential. We must all do our part to protect our communities and our planet.

We can win this fight, but it will take all of us working together.
